The Red River Runners will host the 9th annual Song Hong Half Marathon on Sunday December 13th in Hanoi. This year’s event includes 5 km, 10 km, and 21 km (half marathon) races and is themed the Run for Rhinos. The race aims to bring attention to the crisis rhino populations are facing as a result of the senseless poaching for rhino horns, which are used in traditional medicine and as status symbols in Vietnam and China.

Education for Nature Vietnam (ENV) has partnered with the Red River Runners once again this year to help promote the need to protect rhinos; together we’re urging the public to stop the consumption of rhino horn and show their support for rhinos by joining the 5 km Run for Rhinos race.

Last year, more than 400 people participated in the race. This year, the Red River Runners and ENV hope to have many more people involved.

The proceeds of the marathon will go to help support rhino protection efforts in Vietnam.

Let’s Run for Rhinos!
