

Australian Government

YEAR IN INDUSTRY INTERN

Centre for Accelerator Science (CAS), ANSTO

Full-time Internship | 12 Months (July 2026 – July 2027)

Salary: \$58,893 per annum + 15.4% superannuation

Location: Sutherland Shire, Sydney

Kickstart your science career with a 12-month paid internship at Australia's leading nuclear science facility. The ANSTO Year in Industry Program offers penultimate-year science students a unique opportunity to gain hands-on experience in a world-class research environment, working alongside expert scientists and engineers.

Throughout the program, you will develop practical skills in laboratory operations, sample preparation, and advanced analytical techniques, including exposure to Accelerator Mass Spectrometry (AMS). You will contribute to real research workflows, supporting data collection, analysis, and reporting while building strong technical and professional capabilities.

This full-time placement is ideal for students studying Chemistry, Earth Science, Environmental Science, or related disciplines who are ready to defer studies for one year and gain meaningful industry experience.

If you're looking to bridge the gap between study and career, this internship offers a unique opportunity to join a nationally significant research organisation and build a strong foundation for your future in science.
